PROFESSIONAL SUMMARY

IT Support Professional with 2 years of experience managing corporate technical infrastructure and providing high-level support for internal customers. Proven expertise in troubleshooting LAN/WAN, managing Windows/Linux environments, and resolving complex hardware/software issues. Strong focus on Operational Excellence and reducing system downtime through proactive asset management and incident resolution.

TECHNICAL SKILLS

Networking: Cisco, Nivetti, Tejas Switches; TCP/IP, VLAN, Routing/Switching, Fiber & Copper Cabling

Hardware: Dell PowerEdge, HPE ProLiant, Rack & Stack, Break-Fix, RMA Processing, Cable Management (Cat6/Fiber), PDU/UPS Management, DCIM Tools

Operating Systems: Windows 10/11, Windows Server (Active Directory, DHCP, DNS), macOS, Linux

Tools: Shell Scripting, SCCM, CLI, Docker, Jenkins, Hardware Health Monitoring

IT Operations: Ticketing Systems (Jira), Asset Management, Procurement, Disaster Recovery

Tools & Equipment: OTDR, Cable Testers, Crimping Tools, Label Makers, Rack Mounting Hardware, Serial Consoles

Leadership: Incident Response, Change Management, Shift Handover Documentation, Vendor Coordination

EXPERIENCE

IT Support & Systems Engineer

NSRY, SVP (Naval Ship Repair Yard)

Sep 2025 – Present

Sri Vijaya Puram, India

- Manage high-level network engineering for the Naval Communication Network, specializing in the configuration and deployment of enterprise-grade Cisco, Nivetti, and Tejas switches.
- Perform break-fix repairs and RMA processing on Dell/HPE server hardware, maintaining 24/7 uptime for critical naval resource management systems.
- Perform structured cabling (fiber and copper), hot/cold aisle management, and rack-level power distribution (PDU/UPS) to maintain thermal efficiency and uptime.
- Execute complex password recovery and firmware update protocols on legacy and modern networking hardware to restore system connectivity and security.
- Coordinate onsite technical maintenance and rack-level deployments, ensuring strict adherence to safety and operational reliability standards in a high-stakes environment.
- Manage user account administration and troubleshoot domain trust relationship issues via Active Directory, resolving endpoint authentication failures and account lockouts to minimize user downtime.

Infrastructure and Deployment Consultant

Independent / Freelance

Jan 2023 – Present

Remote

- Performed physical server installation, rack mounting, and network configuration for a client hosting environment, ensuring stable connectivity and optimal hardware placement for production workloads.
- Deployed and maintained on-premise server infrastructure for clients, integrating hardware health monitoring tools to track system performance and data integrity across distributed nodes.

KEY ACHIEVEMENTS

- Led a full-scale network migration across a high-security naval facility, consolidating isolated network segments into a unified infrastructure — playing a key role in endpoint migration and switch configuration.
- Diagnosed and resolved a recurring underwater OFC cable fault in a marine environment using OTDR testing, identifying and restoring connectivity to a naval floating dock each time the fault occurred.
- Recovered a wall-mounted rack collapse during live operations, re-deploying and restoring full connectivity within 15 minutes, maintaining near-zero unplanned downtime.
- Maintained 24/7 network availability across a classified naval facility throughout tenure, with only 1–2 recorded downtime incidents over the entire period.

EDUCATION

KL University

Bachelor of Computer Applications

Relevant Coursework: Data Structures, Algorithms, Operating Systems, Networking

Vijayawada, India

CGPA: 8.95
