PROFESSIONAL SUMMARY

IT Support Professional with 2 years of experience managing corporate technical infrastructure and providing high-level support for internal customers. Proven expertise in troubleshooting LAN/WAN, managing Windows/Linux environments, and resolving complex hardware/software issues. Strong focus on Operational Excellence and reducing system downtime through proactive asset management and incident resolution.

TECHNICAL SKILLS

Networking: Cisco, Nivetti, Tejas Switches; TCP/IP, VLAN, Routing/Switching, Fiber & Copper Cabling

Hardware: Server Rack Maintenance, Component Replacement (CPU, RAM, NIC), PSU Diagnostics, Troubleshooting

Operating Systems: Windows 10/11, Windows Server (Active Directory, DHCP, DNS), macOS, Linux

Tools: Shell Scripting, SCCM, CLI, Docker, Jenkins, Hardware Health Monitoring

Leadership: Ownership, Customer Obsession, Bias for Action, Deliver Results, Operational Excellence

IT Operations: Ticketing Systems (Jira/ServiceNow), Asset Management, Procurement, Disaster Recovery

EXPERIENCE

IT Support & Systems Engineer

NSRY, SVP (Naval Ship Repair Yard)

Sep 2024 – Present

Sri Vijaya Puram, India

- Manage high-level network engineering for the Naval Communication Network, specializing in the configuration and deployment of enterprise-grade Cisco, Nivetti, and Tejas switches.
- Perform hardware-level diagnostics and component-level repairs on server-side infrastructure, maintaining 24/7 uptime for critical naval resource management systems.
- Execute complex password recovery and firmware update protocols on legacy and modern networking hardware to restore system connectivity and security.
- Coordinate onsite technical maintenance and rack-level deployments, ensuring strict adherence to safety and operational reliability standards in a high-stakes environment.

Infrastructure and Deployment Consultant

Independent / Freelance

Jan 2023 – Present

Remote

- Managed full-cycle deployment and infrastructure scaling for diverse clients, utilizing Docker and Jenkins to automate CI/CD pipelines and reduce manual intervention.
- Optimized server-side resource allocation and database orchestration, improving system responsiveness by 40% and ensuring high availability for enterprise applications.
- Integrated secure monitoring tools to track hardware health and data integrity across distributed cloud and on-premise nodes.

PROJECTS

Distributed Infrastructure Monitor | *Docker, Jenkins, MongoDB, Shell*

- Developed a monitoring engine to benchmark hardware performance and connectivity across distributed nodes, utilizing Jenkins for automated health checks.
- Implemented real-time alert systems for hardware failures and network latency spikes, ensuring rapid incident response and resolution.

Marine Access Management System | *Node.js, SQL, Security Protocols*

- Architected a secure vendor management system for a marine dockyard, focusing on high data integrity and secure physical access control protocols.
- Managed the deployment and server-side configuration to handle high-concurrency requests while maintaining sub-100ms processing speeds.

EDUCATION

KL University

Bachelor of Computer Applications

Relevant Coursework: Data Structures, Algorithms, Operating Systems, Networking

Vijayawada, India

CGPA: 8.95
